## SMART FEEDER SYSTEMS [ASB-SF]

*just get to the point*

**PFANKUCH  
 SMART FEEDER  
 SYSTEMS**

New machine design for automated feeding of products specially to be integrated to other machine concepts.

Price range with unequally handling and extrem fast exchange of wear parts.

Highly attractive price performance ratio.

Most compact design.

Pfankuch Maschinen the specialist for the feeder integration to your production lines.

*Advantages at a glance:*

- damage free separation also of sensitive products
- precise separating, counting and feeding
- minimal change over time, easy handling
- various software moduls for example for pre selectable quantity of product counts
- infinitely size adjustment, scales
- easy to adapt to changing product requirements
- new extremely modular concept
- easy integration to OEM machines, tailor made designs
- control unit with graphic display to be mounted according to operating requirements
- with intuitively visualisation
- high quality machine concept
- low maintenance design

**TECHNICAL  
 MACHINE EQUIPMENT**

- servo drive
- product thickness up to 10mm
- fotooptical double sheet control
- feeding speed adjustable up to 150m/min.
- intermittent feeding speed up to 500 1/min. product dependend
- external start and reset signal control
- international protection code IP 65
- sizes up to A4, wide edge leading
- extended product capacity by autoloader use

- different types of delivery versions and length
- special design is our mission
